Bayer AG	GER	4.3	95

ESG RATINGS

Overview

There is a growing demand for Environmental, Social and Governance (ESG) factors to be incorporated into investment decision making and stewardship. The FTSE4Good ESG Ratings are based on EIRIS research and provide objective ESG risk and performance data that is based on clear and easy to apply methodologies

Measuring risk and performance

Companies with higher ESG risks must achieve more to obtain a high score. The ratings indicate a company's success at managing its company-specific ESG risks

Clear methodology and robust governance

The FTSE4Good ESG Ratings follow clearly defined risk and performance thresholds defined in publicly available criteria. To ensure their quality and accuracy, an independent committee oversees the ratings, while leading research provider, EIRIS, conducts independent research

The six ESG themes cover Environmental Management, Climate Change, Supply Chain Labour Standards, Human & Labour Rights, Corporate Governance and Countering Bribery

Companies' overall ESG rating is scored on a scale from 0-5, with a supersector-relative score out of 100

Construction & Materials
